

Preliminary Positions for VECTOR Stations

The positions listed below are PRELIMINARY, and will be superseded once their official positions are computed by the National Geodetic Survey (NGS).

These preliminary positions were computed by averaging multiple OPUS solutions. Each position consists of the average of a minimum of 15 24-hour OPUS solutions.

Once the NGS has published the official positions for these stations, this document will be removed and replaced with a link to the official positions.

The positions listed below are for the Antenna Reference Point (ARP)

Preliminary Positions - NAD83 CORS96(Epoch 2002)						
STATION	ID	LATITUDE	LONGITUDE	HAE	NORTHING (m) VT SPC	EASTING (m) VT SPC
Richmond	VTRI	44-24-47.72686	072-59-41.37425	112.278	212677.557	460589.779
White River Jct.	VTWR	43-38-56.56926	072-19-02.66912	97.552	127664.091	514730.526
